

Leedo offers four drawer slides for our traditional cabinets:

- + An epoxy-coated steel slide offering approximately  $\frac{3}{4}$ " extension
- + A full-extension ball bearing slide that mounts on the side of a drawer box
- + A full-extension, ball bearing, side-mount slide that incorporates a soft-close mechanism
- + A full-extension, ball bearing, bottom-mount slide that incorporates a soft-close mechanism

Learn more about each product below, or contact a Leedo specialist to decide which slide will best meet your needs.

### Full Extension

Our full extension slide is a galvanized steel, ball bearing drawer slide that enables full access to the contents of a drawer.

### Slow-Close Full Extension

Leedo provides a full-extension ball bearing drawer slide that incorporates a slow-close mechanism to prevent hard closures. Available in side-mount or bottom-mount.

### Standard

Our standard drawer slide is a nylon tired, epoxy-coated steel slide offering approximately  $\frac{3}{4}$ " extension.
